

# ALMASONS GiNi<sup>®</sup>

MAINTAIN & INSPECT

## Create Digital Maintain, Inspect, Task Lists - and Record Every Step

Checklist Builder + Worker App + Supervisor Control System = a Complete Platform

**Almasons GiNi<sup>®</sup> Maintain & Inspect** converts your paper-based checklists, procedures, and task lists, into digital step-by-step guides. The solution includes modern GUI Android mobile apps, and a Supervisors Console - used to create, assign, and track all tasks, and to save records. This helps ensure all steps are completed as directed, and on schedule.

**Checklists** are converted into digital workflows that can be navigated by touchscreen or completely by voice commands, running on Android devices.

Voice-driven M&I leaves workers' hands-free to focus on the job. Add notes, diagrams, images, and videos to guide new workers, clarify procedures, and for all equipment types.

A variety of response types are supported – Yes/No, Pass/Fail, Numeric Input, Multiple Choice, and others.

All M&I steps are recorded, date/time/location stamped (as required). Completion text notes, voice notes, images, and videos can be captured and retained.

**Ensure OSHA compliance**, create a safer working environment, extend the life of your equipment, cut downtime with Almasons GiNi<sup>®</sup> Maintain & Inspect.

# Digital M&I offers four major advantages:

## Dynamic

Current workflows can be deployed instantly organization-wide. Can adapt to the skill and experience of workers (offering more guidance to new teammates).

## Controlled but Flexible

You can be as strict or loose as you please with policy requirements. Ensure 100% compliance when safety or protocols demand it. Easily adapted as your needs change.

## Built-In Asset Management

When inspections show a critical failure, prompt users for detailed notes/images/video of the fault and take that asset out of service until repaired. Trigger urgent repair orders. Maintains long-term asset utilization data.

## Labor-Friendly

User-friendly modern interfaces, and optional voice controls for each worker in their native tongue, makes it easier to hire, train, and retain workers. OSHA and labor law compliance can be ensured.

## Key Solution Characteristics

- **Step-by-step workflows** are created to match your unique needs, and are developed and maintained by your personnel, by your rugged Android device supplier, or by Almasons – your choice.
- **Pre-Built OSHA Checklists** for all common Warehouse equipment, like forklifts.
- **Supervisor Console (Almasons GiNi Cockpit)** is Windows server-based and can be installed on-prem, private cloud, public cloud. Browser access to the Cockpit is via Ethernet/WiFi/WWAN comms.
- **Use in any industry**, your processes, your equipment, your preferences. Run your warehouse, factory, store, or healthcare M&I operations Your Way.
- **Runs on Android 9-13** handhelds, wearables, or tablets for app/procedures. Navigate by touchscreen controls, voice commands, or both – lets you work “hands free” while capturing data. WiFi and WWAN comms are supported. ID assets via barcodes, code numbers, or RFID tags, and trigger the correct and current procedure.
- **Optional voice commands** and prompts supported in 65 languages/dialects for your diverse global workforce.
- **Labor Management** module is optional and tracks second-by-second workflow actions for all connected workers. Labor insights are then delivered in analytics data, reports, and real-time dashboards. Seek and destroy time-wasting bottlenecks, discover ways to streamline steps. Use comparative performance data for employee coaching, compensation, gamification, and for fact-based & well-documented disciplinary actions.
- **Subscription Pricing**, with low initial costs. No long-term commitments required. Annual platform updates are included. Online support is included – we’re responsive and offer expert guidance.

# The Almasons Advantage

## We're trusted

We listen carefully to your needs, then offer time-tested advice. We've been there, done that, countless times, yet we're always looking to reimagine what's possible.

## We're Fast

We take pride in building platforms that are easy for users to set up quickly at minimal cost, with the fewest possible precious IT resources.

## We're Affordable

Our subscription pricing is affordable. We ensure no surprises with upcharges. Licensing for M&I requires zero long-term commitment, or choose multi-year locked in pricing – your choice.

## We're Proven

Our team bring decades of experience with enterprise management systems. Our "new" M&I platform leverages 10 years of our prior investments system and deployment experience.

## Don't Just Believe Our Claims, Try Us

Our M&I platform is easy to try, at minimal cost. Call us and we'll get you started the next day.
