

# ALMASONS GINI

**VOICE + WORKFLOWS** 

# Supply Chain Workflows - Streamlined, Modern, Voice-Enabled

Worker apps + Supervisor Control System + Backend Integrations = a Complete Platform

Almasons offers a full range of workflow modules covering all major Supply Chain needs from Receiving to Picking through Loading.

0 11

Our workflows were designed for Android devices and can be operated with either touchscreen controls or voice or both, depending on your preferences for each module. Our workflows are highly flexible and adapted to your unique needs, in 3-5 weeks. Use one module or use them all. Leverage industrial-strength voice recognition to drive maximum efficiency.

And our workflows are just part of complete solution including pre-built integrations with all ERP, WMS, TMS, and CRM systems, a Supervisor's Console with features unmatched by alternative control systems, and built-in Labor Management and Reporting components.

# Almasons workflows offer four major advantages over traditional supply chain solutions:

#### **Faster**

**25+%** faster vs. barcode-driven picking in highvolume operations. Faster training, to full productivity.

#### **Accurate**

Errors from "attention switching" reduced. **20+%** cuts in mispicks are typical.

#### Safer

Focus on the task at hand, not the gear in hand. Eyes-Up & Hands-Free. Less product and worker damage.

# Labor-friendly

Easy to Learn. Helps with recruiting, training, retention.

Our Supervisor's Console that we call **"The Cockpit"** is equally modern in design, is flexible and adaptable, and captures second-by-second data on every worker's activities on every shift.

**Our Analytics Engine** brings this data to you in tables, in standard reports, and in real-time dashboard modules, giving you a level of Labor Management visibility and insight simply not offered by ERP & WMS vendors, or only after high-cost custom programming lasting many months.

And we deploy systems from initial consultations with you on the detailed requirements you have to delivered turn-key solutions in just 6-10 weeks typically, depending on scope of your needs.

We're fast and this saves you time and money upfront.

Our pricing approach is unique as well – low upfront costs, matched with affordable subscription pricing, with no upcharges for future changes you request. We provide Fixed Bids, Predictable Costs, and Zero Surprises!

# **Key characteristics:**

Almasons workflows are written using flexible tools and offer modern user interfaces. We don't dictate how your workflows must operate – instead we listen to your unique needs, offer time-tested advice, and then adapt the final solution to work Your Way.

Our apps can be used with touchscreen and voice-driven controls, and we support barcode scanning & RFID inputs – whatever meets your needs & preferences.

Our workflows run on Android 9+ devices and have been tested on all popular rugged devices from leading manufacturers around the world. Choose the vendor, device and form factor you prefer – handhelds, tablets, wearables, and soon AR headsets and Robotics integrations. Pick the specific devices you need per zone in your factory, warehouse, or retail store. We're ready for your needs now and in the future.

Voice integrations are based on the Almasons Voice Engine – a cutting-edge module now offering 65 standard languages and dialects for out-of-the-box recognition and response. Our system can also be quickly trained to handle highly distinct languages, your custom vocabularies, and even unusual styles of speaking including personal impediments.

We have successfully integrated with all major ERP & WMS systems from all the major vendors, even handling your home-brew system is no problem for Almasons. We are SAP-Certified, and we have yet to find an Enterprise backend system we could not connect with. Tell us about your systems and we'll offer the best options for maximum performance.

**Our Supervisors Console (Cockpit)** runs on a Windows Server instance, and be installed on an onpremise server, or via private or public cloud.

# **The Almasons Advantage**

# We're trusted

We provide clear Statements of Work and fixed bids. We deliver what we promised, guaranteed. Ask any of our reference customers.

# We're Fast

We listen intently and learn quickly - and then we adapt our solution to your requirements in just a few weeks, not many months.

### We're Affordable

We keep our costs low, and your prices affordable. We've often been told "you don't charge enough for this" Seriously – Let us give you a quote to see.

# We're Proven

Our team brings decades of experience with enterprise integration projects, both large and small. We know how to run projects that are on-spec, on-schedule, at promised costs. We even offer money-back guarantees . . . but have never actually needed one!

# Want to Test Our Claims ... Try Us

We offer low or no-cost on-site testing for many of our solutions. Contact Almasons.com to learn more.
