Action : Replace

GiNi LABOR MANAGEMENT
Powered by AI

Your Team, Your Dashboard, Your Way.

GiNi Labor Management integrates with workflows running on your operator's handheld device, capturing second-by-second data through their entire work day. This data feeds intuitive dashboards, providing organization-wide insights.

Weather data input: Plan proactively with weather-based productivity forecasting, ensuring labor and shipments stay on track despite the rain, snow, or heat.

Operator & product data input: GiNi LM also considers operator experience, skill level, and product characteristics such as weight and volume to set realistic productivity expectations and support business continuity planning.

Every second counts, track it with

GiNi captures second-by-second data of the time spent by your operators on each task and classifies them for clear visibility.
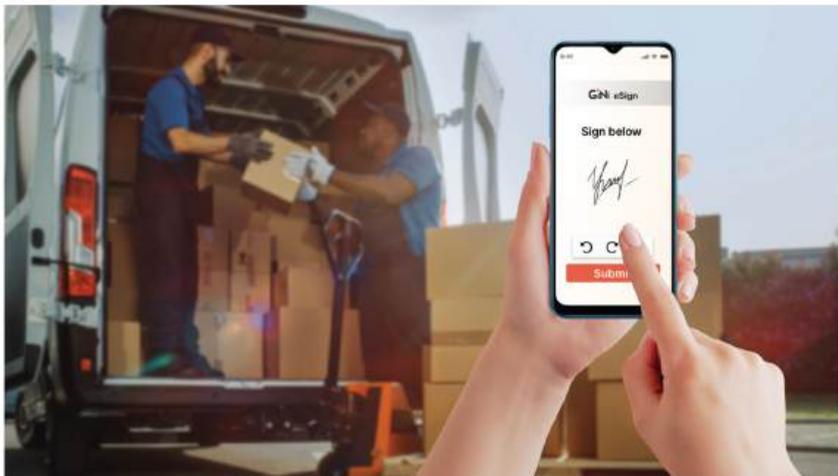

Acess real-time and historical data to optimize operations, remove bottlenecks, and make informed decisions on coaching, compensation, and discipline.

AI powered workforce optimization

GiNi eSIGN

Safe, Easy, and Reliable Digital Signatures.

Go digital - forget about printing, scanning, and mailing! Sign documents securely with GiNi eSign, a legally binding eSignature solution for a faster, hassle-free experience.

GiNi eSign highlights:

- Web-Based Solution
- Drag-and-Drop Signature Placement
- Simple Interface
- Real-Time Notifications
- Centralized Electronic Storage of signatures and documents

Send signature requests through Email, SMS, iMessage, Telegram and WhatsApp

Why GiNi eSign?

Our solution lets you sign documents in just a few clicks. It's legally compliant, highly secure, and allows you to streamline your workflow, reduce operational costs, and accelerate document turnaround time.

> ❝ Before adopting Almasons' eSign solution, we spent 20 to 30 minutes per truckload. Now, with Almasons eSign, it's less than a minute. The ROI is incredible—we've implemented it in 10 warehouses! ❞
>
> - Gary Taylor - Fort Worth Warehouse Manager, Bunge

Features of GiNi eSign:

- **Sign Anytime, Anywhere:** Sign on your phone, tablet, or computer from anywhere.

- **Secure & Verified**: Receive a PIN via email or text, with multi-layer verification to ensure signature safety and authenticity.

- **Document Integrity:** Once signed, documents are locked and cannot be edited.

- **Track Your Signatures:** See exactly when documents are sent, viewed, and signed.

- **Multi-Language Support:** Available in several languages for teams worldwide.

- **App & CRM Integration:** Integrate GiNi eSign with the apps and CRMs you already use.

GiNi VOICE DEVKIT

Powered by AI

Give your app a voice with Almasons GiNi® Voice DevKit in less than 2 weeks.

The GiNi Voice Devkit is an easy-to-use toolkit that adds voice control to your app without major code changes.

In as little as 1-2 weeks, your app can start understanding voice commands, making it safer and easier to use in 65 languages & dialects!
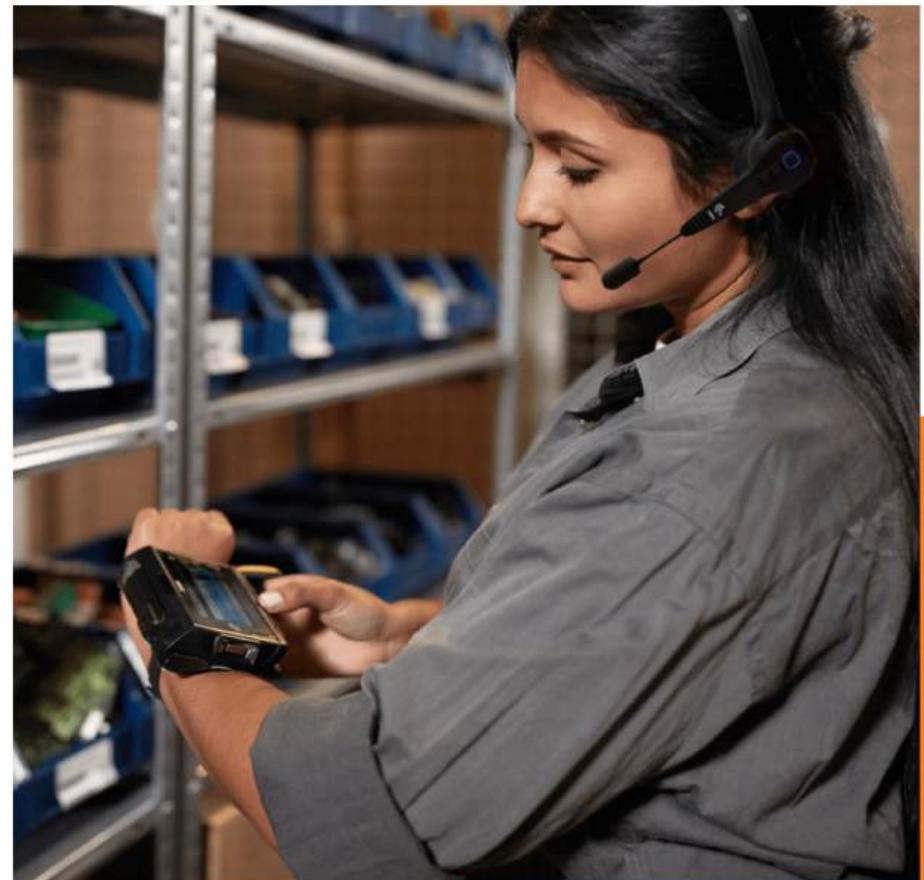

Why You'll Love It:

- No Need to Rewrite Your App
- Quick and Easy Setup
- Helps You be Safer and More Productive
- Supports 65 Languages & Dialects
- Customizable Voice Recognition
- Affordable pricing

How It Works:

The Almasons GiNi® Voice Devkit uses **AI-powered** speech recognition technology to understand voice commands accurately. It works directly on your device, so you don't need the internet.

No Complicated Setup: The GiNi Voice Devkit runs silently along with your custom application without requiring any complex setup.

GiNi ENGAGE

Monitor your team from anywhere!

With Gini Engage, you can monitor, guide, and communicate with your operators from anywhere, whether you're at your desk, or on the move.

Say Goodbye to Radios and Intercom

GiNi Engage integrates seamlessly with your workflows, and eliminates the need for alternate communication methods such as intercoms and radios.

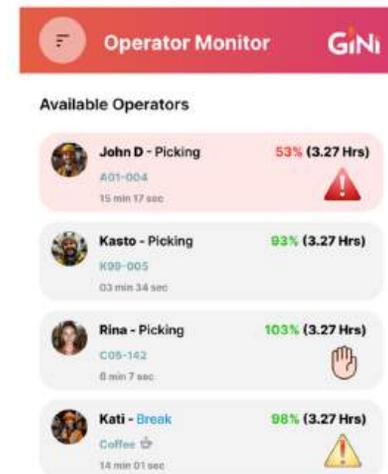

What Can Gini Engage Do?

Video & Voice Calls — **Live Monitoring** — **Operator Task Status** — **Instant Messaging** — **Screen Sharing**

All-in-One Communication & Monitoring – No Hassle!

Whether you're a manager using our supervisor's console called, "Cockpit", or an operator using the Android app, Gini Engage ensures communication and operations run smoothly. No more jumping between apps, everything you need is in one place.

## Product highlights:

Real-Time Updates

See exactly what tasks your operators are currently working on, live!

Dialog Monitoring

With the dialog monitoring feature, listen in to any operator's device in real-time, and use **Push-to-Talk** to train, or assist with tasks.

Voice and Video Calling

Get in touch with your team instantly, whether it's a voice call or a face-to-face video chat.

Incident reporting

Operators can proactively report incidents by sharing pictures, videos and voice notes directly with their supervisor.
